

Learning Resource Catalogue (Peter Harris)

Synopsis

- U21 Managers, in April 2004, decide not to support further development of LRC3
- The Digital Learning Objects Catalogue (DLOCat) is currently being utilized as an alternative catalogue for U21 Health Sciences, at no cost
- DLOCat is password protected and functions as a noticeboard of available resources
- DLOCat is not a repository of resources and therefore there are no intellectual property issues
- feedback on DLOCat thus far, albeit limited, is positive with expressions of interest from potential contributors
- *'the way ahead'* - continued collaboration with interested members; and modifications to the U21 Health Sciences web site to enable members to submit learning object details, and provide them with access to current Health Sciences catalogues
